LINGKUNGAN STRATEGIS

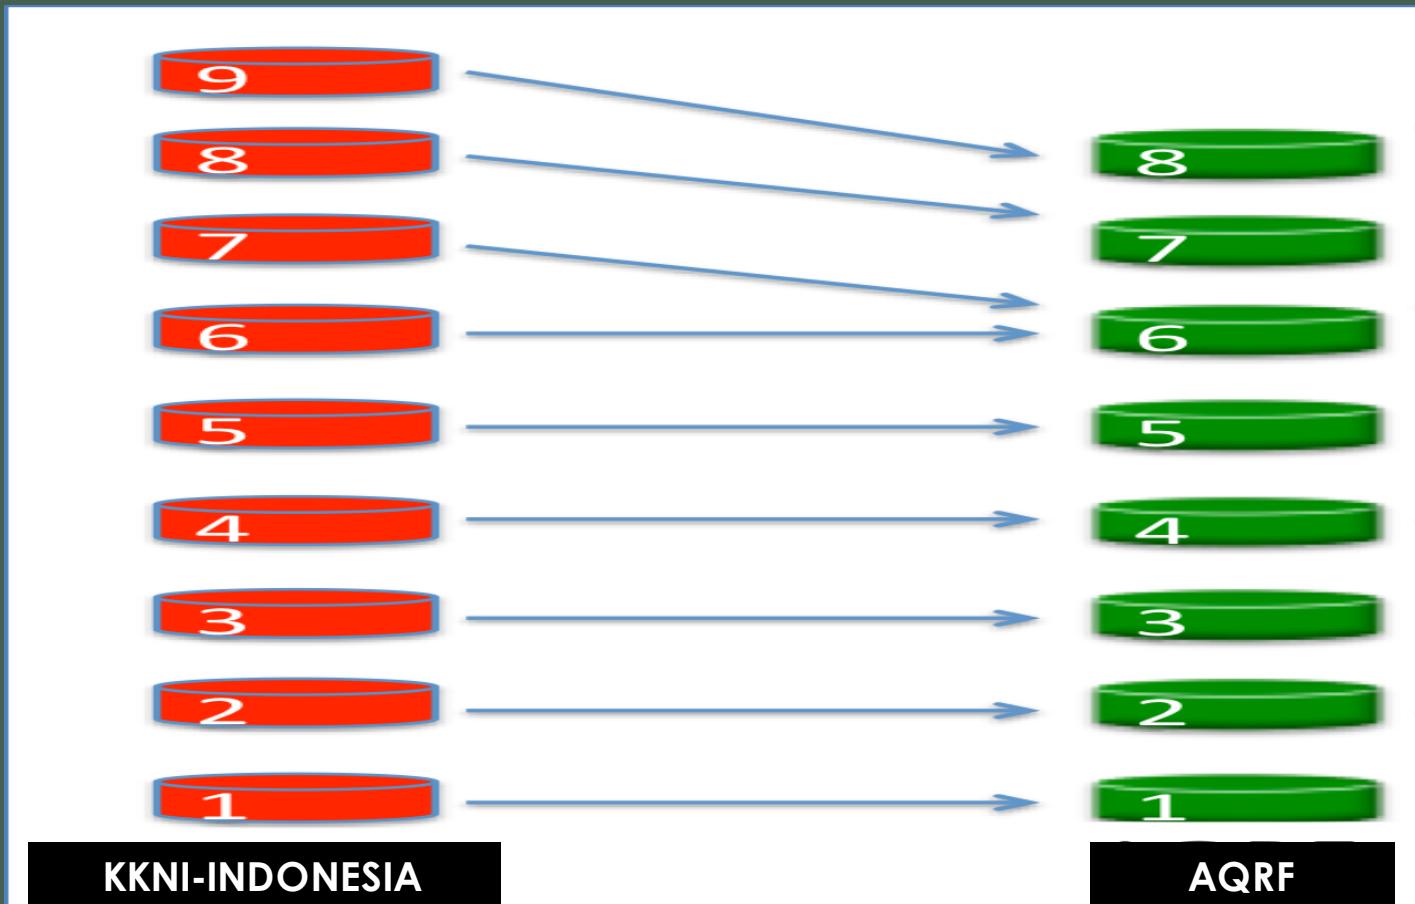

AQRF
ASEAN Qualification Reference Framework

Qualification: A package of standards or units judged
to be worthy of formal recognition in a certificate. (ILO,
2007)

AQRF (ASEAN Qualification Reference Framework)

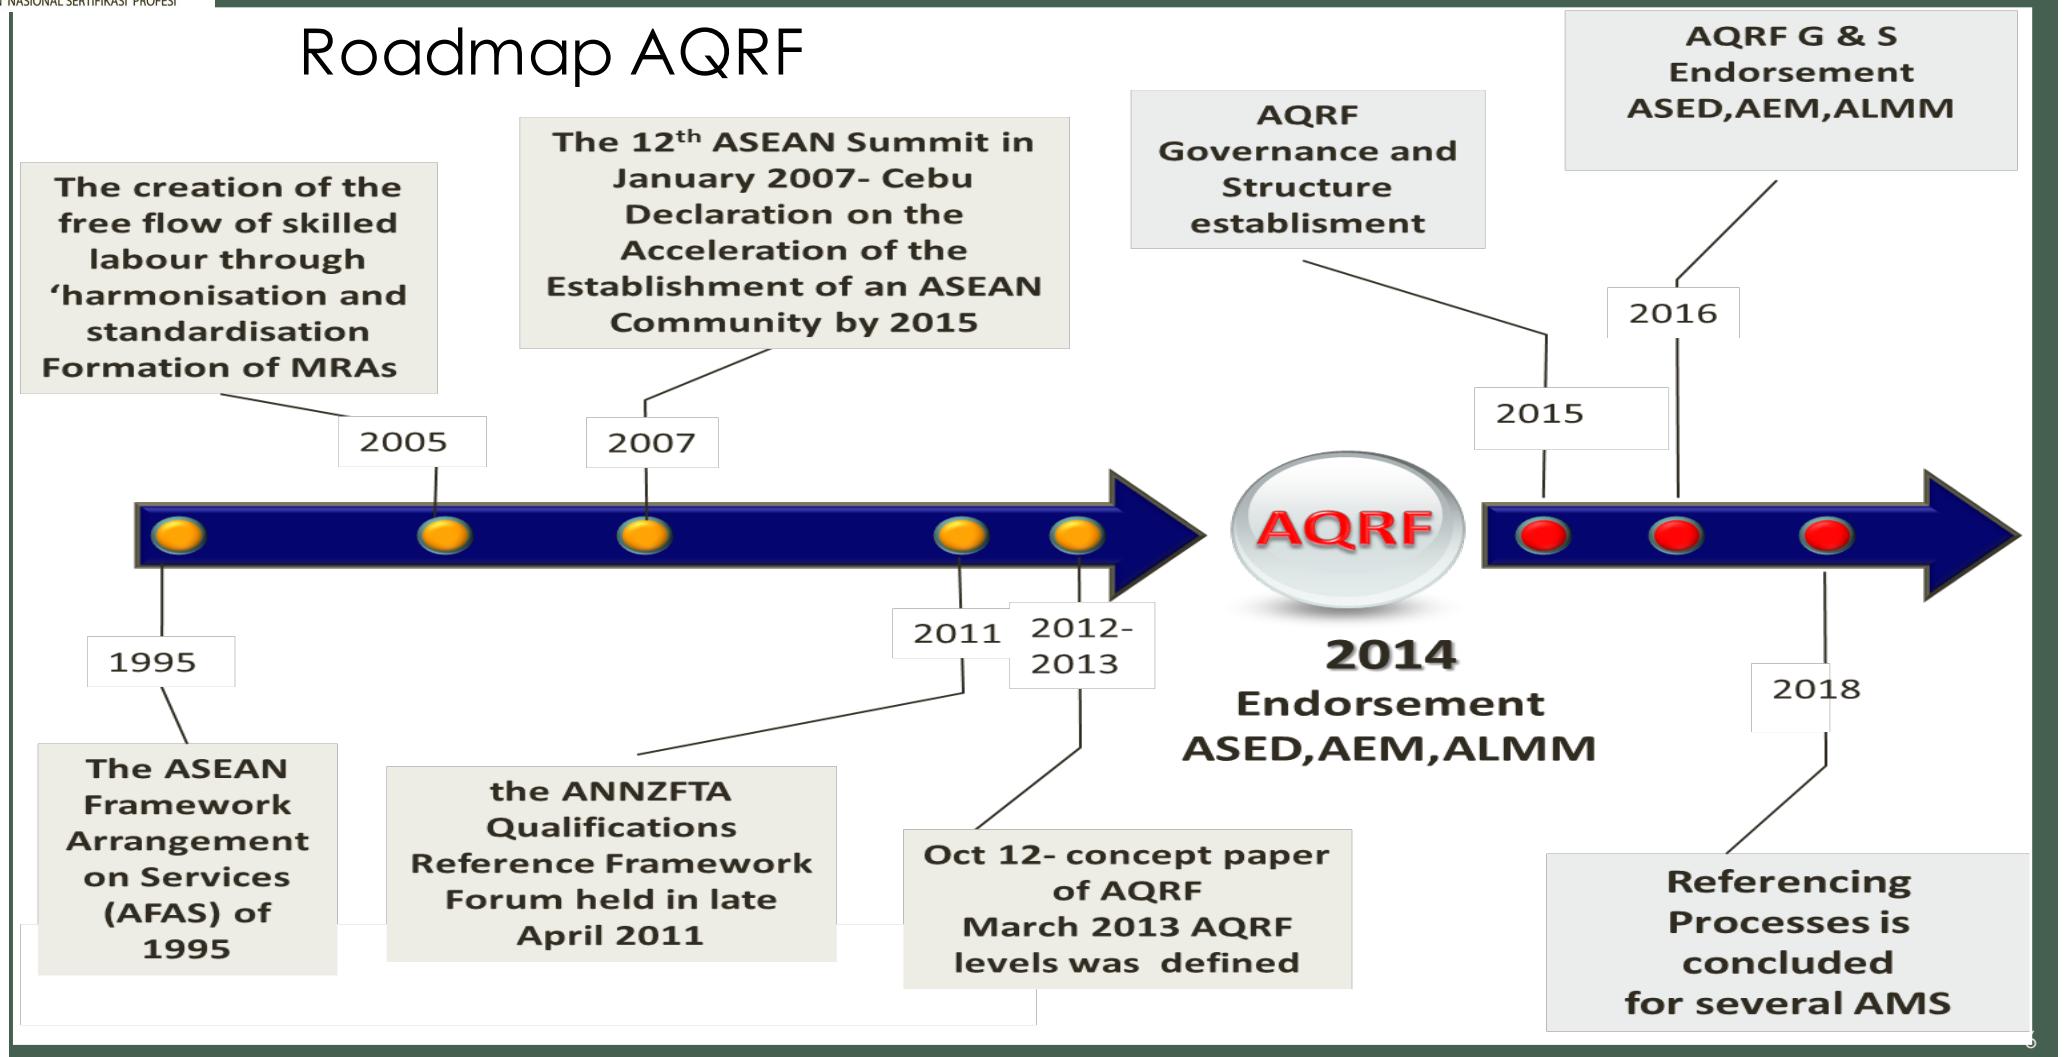

ILUSTRASI EKIVALENSI DESKRIPSI KKNI DAN AQRF

Identified by matrix equivalency process by BNSP, 2015

Roadmap AQRF

ASEAN Guiding Principles

for Quality Assurance and Recognition of
Competency Certification Systems

One Vision
One Identity
One Community

The guidelines include:

1. Overview of National Qualification's Frameworks of AMS (Section 1)
2. Overview of competency certification systems of AMS (Section 2)
3. Discussion of key aspects of quality assurance (Section 3)
4. **Agreed guiding principles and protocols for quality assurance as it relates to competent bodies and to providers of assessment services (Section 4)**
5. **Agreed guiding principles and protocols for recognition of competency certification systems (Section 5)**
6. **Overview of the AQRF and how competent bodies could participate in national referencing activities (Section 6).**

Development of the TVET products

Within any TVET system, there are multiple options for the construction of TVET achievement standards, including:

Competency standards

- are statements of knowledge, skills and/or competence linked to a job

Occupational standards

- are statements of activities and tasks related to a specific job and its practice.

Certification standards/ Scheme

- are **statements of learning outcomes** to be assessed and the methodology to be used

Assessment standards

- which are rules for obtaining an award and the rights conferred

Educational standards

- which are statements of learning objectives, content to be addressed, entry requirements and resources required.

Updated guidelines for development of Regional Model Competency Standards
